Toxicology, 67 (1991) 361—364
Elsevier Scientific Publishers Ireland Ltd.

TOXICOLOGY

SUBJECT INDEX

Volume 67 (1991)

N-acetylcysteine, protection, mercuric chloride, nephrotoxicity, 155
adrenal cortex, spironolactone, cytochrome *P*-450, covalent binding, microsomal protein, 143
amphetamine, carcinogenesis studies, F344/N rat, B6C3F1 mouse, 325
apomorphine, dopamine receptor, membrane fluidity, calcium, prolactin, basal ganglia, 333
arsenic, cadmium, cardiotoxicity, glutathione, metallothionein, lipid peroxidation, co-exposure, 227

B6C3F1 mouse, amphetamine, carcinogenesis studies, F344/N rat, 325
basal ganglia, apomorphine, dopamine receptor, membrane fluidity, calcium, prolactin, 333
N-bis(2-hydroxypropyl)nitrosamine (BHPN), tumor promotion, lung, nasal cavity, rats, nitrogen dioxide, 211
body temperature, organophosphates, temperature regulation, motor activity, metabolism, evaporative water loss, peripheral vasodilation, 1

cadmium, arsenic, cardiotoxicity, glutathione, metallothionein, lipid peroxidation, co-exposure, 227
cadmium, lipid peroxidation, thiobarbituric acid reactive substances, dose-response, time-response, 303
cadmium, small intestine, heme oxygenase, drug metabolizing enzymes, cytochrome *P*-450, 199
calcium, apomorphine, dopamine receptor, membrane fluidity, prolactin, basal ganglia, 333
carbon tetrachloride, glutathione transferases, glutathione, hepatoxicity, cultured hepatocytes, deoxycholic acid, 237
carcinogenesis studies, amphetamine, F344/N rat, B6C3F1 mouse, 325
cardiotoxicity, arsenic, cadmium, glutathione, metallothionein, lipid peroxidation, co-exposure, 227
catecholamines, glutathione, cold restraint, liver, stress, 29
catfish, endosulfan, thyroxine, triiodothyronine, 187
chlorination by-products, monochloroacetic acid, sodium monochloracetate, chloroacetic acid, 171
chloroacetic acid, monochloroacetic acid, sodium monochloracetate, chlorination by-products, 171
chloroacetonitrile, haloacetonitrile, whole body autoradiography, metabolism, drinking water, disinfectant by-products, 279
cis-diamminedichloroplatinum, renal damage, tissue distribution, Walker 256 carcinoma, sodium *N*-benzyl-D-glucamine dithiocarbamate, 41
co-exposure, arsenic, cadmium, cardiotoxicity, glutathione, metallothionein, lipid peroxidation, 227
cold restraint, glutathione, catecholamines, liver, stress, 29
Cortinarius orellanus, orellanine, Madin-Darby canine kidney cells, rat liver mitochondria, protein synthesis, RNA synthesis, DNA synthesis, 53
covalent binding, spironolactone, cytochrome *P*-450, adrenal cortex, microsomal protein, 143
cultured hepatocytes, glutathione transferases, glutathione, hepatoxicity, carbon tetrachloride, deoxycholic acid, 237
cytochrome *P*-450, cadmium, small intestine, heme oxygenase, drug metabolizing enzymes, 199
cytochrome *P*-450, spironolactone, adrenal cortex, covalent binding, microsomal protein, 143

decontaminant, organophosphate nerve agents, phosphonylated oximes, tissue culture, neurons, 267
deoxycholic acid, glutathione transferases, glutathione, hepatoxicity, cultured hepatocytes, carbon tetrachloride, 237
N,N-diethylphenylacetamide, insect repellent, inhalation, toxicity, 85

disinfectant by-products, chloroacetonitrile, haloacetonitrile, whole body autoradiography, metabolism, drinking water, 279
DNA synthesis, orellanine, *Cortinarius orellanus*, Madin-Darby canine kidney cells, rat liver mitochondria, protein synthesis, RNA synthesis, 53
dopamine, manganese, PC12, HPLC, Parkinsons's disease, 129
dopamine receptor, apomorphine, membrane fluidity, calcium, prolactin, basal ganglia, 333
dose-response, cadmium, lipid peroxidation, thiobarbituric acid reactive substances, time-response, 303
drinking water, chloroacetonitrile, haloacetonitrile, whole body autoradiography, metabolism, disinfectant by-products, 279
drug metabolizing enzymes, cadmium, small intestine, heme oxygenase, cytochrome *P*-450, 199

endosulfan, thyroxine, triiodothyronine, catfish, 187
evaporative water loss, organophosphates, temperature regulation, motor activity, body temperature, metabolism, peripheral vasodilation, 1

F344/N rat, amphetamine, carcinogenesis studies, B6C3F1 mouse, 325

glutathione, arsenic, cadmium, cardiotoxicity, metallothionein, lipid peroxidation, co-exposure, 227
glutathione, cold restraint, catecholamines, liver, stress, 29
glutathione, glutathione transferases, hepatoxicity, cultured hepatocytes, carbon tetrachloride, deoxycholic acid, 237
glutathione, α-tocopherol, nitrofurantoin, protein thiols, 165
glutathione transferases, glutathione, hepatoxicity, cultured hepatocytes, carbon tetrachloride, deoxycholic acid, 237

haloacetonitrile, chloroacetonitrile, whole body autoradiography, metabolism, drinking water, disinfectant by-products, 279
heme oxygenase, cadmium, small intestine, drug metabolizing enzymes, cytochrome *P*-450, 199
hepatoxicity, glutathione transferases, glutathione, cultured hepatocytes, carbon tetrachloride, deoxycholic acid, 237
HepG2 cells, human hepatocytes, hexachlorobenzene, porphyria, liver, 75
hexachlorobenzene, HepG2 cells, human hepatocytes, porphyria, liver, 75
hexachlorobenzene, thyroxine, thyroid, triiodothyronine, pentachlorophenol, tetrachlorohydroquinone, serum levels, 107
hexafluoroacetone, testicular toxicity, perfluoroacetone, testicular atrophy, perhalogenated acetones, 249
HPLC, manganese, PC12, dopamine, Parkinsons's disease, 129
human hepatocytes, HepG2 cells, hexachlorobenzene, porphyria, liver, 75

immunotoxicology, methyl mercury, mouse, NK cells, spleen, thymus, 117
inhalation, *N,N*-diethylphenylacetamide, insect repellent, toxicity, 85
insect repellent, *N,N*-diethylphenylacetamide, inhalation, toxicity, 85

labyrinth layer, MPTP, placental lesions, NMRI mice, 63
lipid peroxidation, arsenic, cadmium, cardiotoxicity, glutathione, metallothionein, co-exposure, 227
lipid peroxidation, cadmium, thiobarbituric acid reactive substances, dose-response, time-response, 303
liver, glutathione, cold restraint, catecholamines, stress, 29
liver, HepG2 cells, human hepatocytes, hexachlorobenzene, porphyria, 75
lung, tumor promotion, nasal cavity, rats, nitrogen dioxide, *N*-bis(2-hydroxypropyl)nitrosamine (BHPN), 211

Madin-Darby canine kidney cells, orellanine, *Cortinarius orellanus*, rat liver mitochondria, protein synthesis, RNA synthesis, DNA synthesis, 53
manganese, PC12, dopamine, HPLC, Parkinsons's disease, 129
membrane fluidity, apomorphine, dopamine receptor, calcium, prolactin, basal ganglia, 333
mercuric chloride, *N*-acetylcysteine, protection, nephrotoxicity, 155
metabolism, chloroacetonitrile, haloacetonitrile, whole body autoradiography, drinking water, disinfectant by-products, 279
metabolism, organophosphates, temperature regulation, motor activity, body temperature, evaporative water loss, peripheral vasodilation, 1
metallothionein, arsenic, cadmium, cardiotox-

icity, glutathione, lipid peroxidation, co-exposure, 227
methyl mercury, immunotoxicology, mouse, NK cells, spleen, thymus, 117
microsomal protein, spironolactone, cytochrome *P*-450, adrenal cortex, covalent binding, 143
monochloroacetic acid, sodium monochloracetate, chloroacetic acid, chlorination by-products, 171
motor activity, organophosphates, temperature regulation, body temperature, metabolism, evaporative water loss, peripheral vasodilation, 1
mouse, immunotoxicology, methyl mercury, NK cells, spleen, thymus, 117
MPTP, placental lesions, labyrinth layer, NMRI mice, 63
Mycobacterium bovis, nickel carcinogenesis, 97

nasal cavity, tumor promotion, lung, rats, nitrogen dioxide, *N*-bis(2-hydroxypropyl)nitrosamine (BHPN), 211
nephrotoxicity, *N*-acetylcysteine, protection, mercuric chloride, 155
nephrotoxicity, *S*-[(1 and 2)-phenyl-2-hydroxyethyl]glutathione, renal metabolism, urinary enzymes, 15
neurons, organophosphate nerve agents, phosphonylated oximes, decontaminant, tissue culture, 267
nickel carcinogenesis, *Mycobacterium bovis*, 97
nitrofurantoin, α-tocopherol, glutathione, protein thiols, 165
nitrogen dioxide, tumor promotion, lung, nasal cavity, rats, *N*-bis(2-hydroxypropyl)nitrosamine (BHPN), 211
NK cells, immunotoxicology, methyl mercury, mouse, spleen, thymus, 117
NMRI mice, MPTP, placental lesions, labyrinth layer, 63

orellanine, *Cortinarius orellanus*, Madin-Darby canine kidney cells, rat liver mitochondria, protein synthesis, RNA synthesis, DNA synthesis, 53
organophosphates, temperature regulation, motor activity, body temperature, metabolism, evaporative water loss, peripheral vasodilation, 1
organophosphate nerve agents, phosphonylated oximes, decontaminant, tissue culture, neurons, 267

Parkinsons's disease, manganese, PC12, dopamine, HPLC, 129
PC12, manganese, dopamine, HPLC, Parkinsons's disease, 129
pentachlorophenol, thyroxine, thyroid, triiodothyronine, hexachlorobenzene, tetrachlorohydroquinone, serum levels, 107
perfluoroacetone, hexafluoroacetone, testicular toxicity, testicular atrophy, perhalogenated acetones, 249
perhalogenated acetones, hexafluoroacetone, testicular toxicity, perfluoroacetone, testicular atrophy, 249
peripheral vasodilation, organophosphates, temperature regulation, motor activity, body temperature, metabolism, evaporative water loss, 1
S-[(1 and 2)-phenyl-2-hydroxyethyl]glutathione, nephrotoxicity, renal metabolism, urinary enzymes, 15
phosphonylated oximes, organophosphate nerve agents, decontaminant, tissue culture, neurons, 267
placental lesions, MPTP, labyrinth layer, NMRI mice, 63
porphyria, HepG2 cells, human hepatocytes, hexachlorobenzene, liver, 75
prolactin, apomorphine, dopamine receptor, membrane fluidity, calcium, basal ganglia, 333
protection, *N*-acetylcysteine, mercuric chloride, nephrotoxicity, 155
protein synthesis, orellanine, *Cortinarius orellanus*, Madin-Darby canine kidney cells, rat liver mitochondria, RNA synthesis, DNA synthesis, 53
protein thiols, α-tocopherol, nitrofurantoin, glutathione, 165

rats, tumor promotion, lung, nasal cavity, nitrogen dioxide, *N*-bis(2-hydroxypropyl)nitrosamine (BHPN), 211
rat liver mitochondria, orellanine, *Cortinarius orellanus*, Madin-Darby canine kidney cells, protein synthesis, RNA synthesis, DNA synthesis, 53
renal damage, *cis*-diamminedichloroplatinum, tissue distribution, Walker 256 carcinoma, sodium *N*-benzyl-D-glucamine dithiocarbamate, 41
renal metabolism, *S*-[(1 and 2)-phenyl-2-hydroxyethyl]glutathione, nephrotoxicity, urinary enzymes, 15
RNA synthesis, orellanine, *Cortinarius orellanus*, Madin-Darby canine kidney cells, rat liver mitochondria, protein synthesis, DNA synthesis, 53

serum levels, thyroxine, thyroid, triiodothyronine, hexachlorobenzene, pentachlorophenol, tetrachlorohydroquinone, 107
small intestine, cadmium, heme oxygenase, drug metabolizing enzymes, cytochrome *P*-450, 199
sodium monochloracetate, monochloroacetic acid, chloroacetic acid, chlorination by-products, 171
sodium *N*-benzyl-D-glucamine dithiocarbamate, *cis*-diamminedichloroplatinum, renal damage, tissue distribution, Walker 256 carcinoma, 41
spironolactone, cytochrome *P*-450, adrenal cortex, covalent binding, microsomal protein, 143
spleen, immunotoxicology, methyl mercury, mouse, NK cells, thymus, 117
stress, glutathione, cold restraint, catecholamines, liver, 29

temperature regulation, organophosphates, motor activity, body temperature, metabolism, evaporative water loss, peripheral vasodilation, 1
testicular atrophy, hexafluoroacetone, testicular toxicity, perfluoroacetone, perhalogenated acetones, 249
testicular toxicity, hexafluoroacetone, perfluoroacetone, testicular atrophy, perhalogenated acetones, 249
tetrachlorohydroquinone, thyroxine, thyroid, triiodothyronine, hexachlorobenzene, pentachlorophenol, serum levels, 107
thiobarbituric acid reactive substances, cadmium, lipid peroxidation, dose-response, time-response, 303
thymus, immunotoxicology, methyl mercury, mouse, NK cells, spleen, 117
thyroid, thyroxine, triiodothyronine, hexachlorobenzene, pentachlorophenol, tetrachlorohydroquinone, serum levels, 107
thyroxine, endosulfan, triiodothyronine, catfish, 187
thyroxine, thyroid, triiodothyronine, hexachlorobenzene, pentachlorophenol, tetrachlorohydroquinone, serum levels, 107
time-response, cadmium, lipid peroxidation, thiobarbituric acid reactive substances, dose-response, 303
tissue culture, organophosphate nerve agents, phosphonylated oximes, decontaminant, neurons, 267
tissue distribution, *cis*-diamminedichloroplatinum, renal damage, Walker 256 carcinoma, sodium *N*-benzyl-D-glucamine dithiocarbamate, 41
α-tocopherol, nitrofurantoin, glutathione, protein thiols, 165
toxicity, *N,N*-diethylphenylacetamide, insect repellent, inhalation, 85
triiodothyronine, endosulfan, thyroxine, catfish, 187
triiodothyronine, thyroxine, thyroid, hexachlorobenzene, pentachlorophenol, tetrachlorohydroquinone, serum levels, 107
tumor promotion, lung, nasal cavity, rats, nitrogen dioxide, *N*-bis(2-hydroxypropyl)nitrosamine (BHPN), 211

urinary enzymes, *S*-[(1 and 2)-phenyl-2-hydroxyethyl]glutathione, nephrotoxicity, renal metabolism, 15

Walker 256 carcinoma, *cis*-diamminedichloroplatinum, renal damage, tissue distribution, sodium *N*-benzyl-D-glucamine dithiocarbamate, 41
whole body autoradiography, chloroacetonitrile, haloacetonitrile, metabolism, drinking water, disinfectant by-products, 279
